Data Collection and Preprocessing

December 15, 2023

0.1 Download the Repository

Repository Link

- This is our team's repository. This repository contains all the necessary code that we worked on and it also contains the dataset that we annotated.
- You do not need to do anything like uploading and adjusting the paths. Just run the cells sequentially.
- All the necessary commands are written in this notebook itself

[1]: !git clone https://github.com/balnarendrasapa/road-detection.git

```
Cloning into 'road-detection'...
remote: Enumerating objects: 324, done.
remote: Counting objects: 100% (65/65), done.
remote: Compressing objects: 100% (52/52), done.
remote: Total 324 (delta 12), reused 20 (delta 12), pack-reused 259
Receiving objects: 100% (324/324), 199.88 MiB | 31.94 MiB/s, done.
Resolving deltas: 100% (105/105), done.
```

0.2 Install the Requirements

- Install all the python dependencies
- After Installing dependencies, Restart the runtime. If you do not restart the runtime, the python will throw "module not found error"

[2]: | | pip install -r road-detection/TwinLiteNet/requirements.txt

```
